

Innovative Software Created by librarians

LRMS is proud to offer an economical library automation software solution.

Genesis G4 is highly advanced and easy to learn and to use.

Since 1989 Librarians have been informing us about their changing needs, and we have met these requests each and every time.

Our G4 Library Management System.. With its user training and product support sessions "held right at your computer workstation" is a well thought out solution and support system.

Making the decision.

(Caller) I can't believe your software does so much for so little cost? I need to see it working, is this possible?
(LRMS) Yes, absolutely we will provide you with a trial Internet connection. This will allow you access to a fully working G4 program.
(Caller) Can we do this now, how long will it take?
(LRMS) Yes, about 10-15 minutes, ready to get started?
(Caller) Yes!

The most important information is found by research and we want to explain why we feel our software deserves your attention.

Librarian customers and LRMS have invested their energy to create a library program that will always meet the needs of the library and the patrons it serves. Our goals are to provide a dynamic and economically priced library management software. Today's G4 program is feature rich and provides a simple to use program that is more economical than

any other. G4 contains a program design that is forever growing, its focus is on simplicity of use and ease of management.

Library Solutions for:

K-12 Education Libraries	Academic Libraries
Public Libraries	Church Libraries
Corporate Libraries	Institutional Libraries

We will provide you with a free trial of G4; Try it, experience it and take your time with it, We will assist you with every aspect of G4 and library automation; rest assured that this program will only get stronger with time as we are determined to provide only the best for our customers! Sincerely,

The folks at LRMS
